

Inferno Strobocop LED

Light Barrier

Inferno Strobocop LED is the next generation security strobe. It produces a blinding, intense flashlight that renders the intruder unable to see. Inferno Strobocop LED has an irregular flash pattern to shock and disorientate. It effects and reduces the sense of locality in dark spaces.

Inferno Strobocop LED is with advantage combined with Inferno Sound Barriers for maximum effect, but can be used as a stand-alone security device.

- **Intensive irregular flashlight**
- **Hard to see - hard to take**
- **Reduces sense of locality**
- **Work with all alarm systems**

Installation of the Inferno Strobocop LED cheats the intruder of the few minutes that could be used between alarm activation and arrival of security or police, protecting the secured areas for that crucial period of time .

The patented irregular flashes, produced by Inferno Strobocop LED, reduce the judgement of distance and the sense of locality. It's hard in dark spaces to successfully carry out the burglary.

Flash intensity	7 - 12 flashes/s, irregular
Dimensions	B = 225 mm/ 8.9 in H = 185 mm/ 7.3 in D = 145 mm/ 5.7 in
Weight	1.5 kg/ 3.3 lb
Power	12 V, 36 W
IP class	IP 65
